Subject: RE: Glass Work Group contacts

So Urosboros, which is close to Harriet Tubman School, the other cadmium hotspot, has stopped using cadmium for the time being.

Subject: Glass Work Group contacts

The purpose of this message is to share the group address list in the "to" box for this message. This list was put together to streamline communications among the many parties that have a stake in working on the recently discovered air toxics issue in SE Portland.

This list has 27 parties on it so far. There are contacts for EPA, Oregon Health Authority, DEQ and Multnomah County health. I tried to be as thorough as possible but may have missed a contact so if you look at the list and see someone missing please let me know and I'll add them to the list. Also, if you don't want to be on the list let me know and I'll take you off.

This is multi-agency list so please keep that in mind when sending messages to the group.

Regards,

Paul

Paul Koprowski
